CTi's Euro Bond System provides you with the ability to have custom marble or granite surfaces in a fraction of the time and expense when compared to the actual products. What is even better is the Euro Bond System is extremely durable and can be applied directly over such surfaces as laminate and concrete.

The Euro Bond System gives you decorating versatility you simply can't get with most countertop and flooring surfaces. It offers dozens of styles and an unlimited palette. Precisely match your color scheme and choose the look that will complement your kitchen's décor. Euro Bond can be applied to countertops, floors, and even back splashes.

The anti-microbial finish helps prevent bacteria, stands up to most kitchen cleaners and household chemicals and resists normal wear and tear. It's waterproof and best of all, it won't break or chip like delicate marble or granite countertops.

The Euro Bond System can be used on:

- Kitchen counters and backsplashes
- Bathroom counters and backsplashes
- Bar tops

It can also be used for:

- Kitchen Floors
- Dining Room Floors
- Basement Floors
- Foyers
- Any place a rich, luxurious look is needed.

Colors are matched as closely as possible to our standards. Colors may be affected by age, light and texture. The color selector is designed to assist you in making your selection from CTi's Acrylistain System colors. CTi's Acrylistain System colors are measured by weight (not volume) and are designed to be mixed with water as the vehicle to dispense the pigments. Colors will vary slightly to dramatically based on application, substrate, temperature and humidity. To ensure proper color, the entire contents of CTi's Acrylistain System should be used. Be sure to thoroughly read all application data. Due to reproduction limitations, it is necessary to reserve the right to allow for reasonable variations of application. Printed colors show approximate colors with the effect of certain texture and sealer alteration along with finishing technique.
