Bringing Design and Beauty to Concrete

Commercial

CTI provides a number of solutions for your business and industrial needs. Whether it's providing your company's logo to the entrance to your business or giving your warehouse a chemical resistant floor that can withstand forklift traffic, CTI has the coating that is right for you.

CTI provides a full line of urethane and epoxy floors that can give an automotive service bay, warehouse floor, commercial kitchen or other industrial areas a tough, chemical resistant floor that is easy to clean, dust free and gives the area a sharp, clean look. Our urethane and epoxy floors will also withstand airplane traffic and heavy machinery to keep your work area looking great.

In addition, CTI can put your company's logo and other designs to create a look that is one of a kind. Our commercial applications are designed to withstand heavy foot traffic, vehicular traffic and keep its great look for years.

CTI Commercial floors can be used in

Warehouses
Airplane hangars
Workshops
Commercial Kitchens
Animal kennels and shelters

Our commercial sealers can protect our decorative overlays in areas such as

Restaurant interiors and entrances
Hair Salons
Schools
Mall and Plaza store fronts

| 25% Nitric Acid | Blistered |
| 37% Hydrochloric Acid | Blistered |

YOUR AUTHORIZED DEALER

Colors are matched as closely as possible to our standards. Colors may be affected by age, light and texture.

The color selector is designed to assist you in making your selection from CTI's Commercial System colors. CTI's Commercial System colors are measured by weight (not volume) and are designed to be added to the 105 grout and 112 Modifier mixture and then sealed with a clear sealer. To ensure proper color, the entire contents of CTI's Commercial System should be used. Be sure to thoroughly read all application data. Due to reproduction limitations, it is necessary to reserve the right to allow for reasonable variations of application. Printed colors show approximate colors with the effect of certain texture and sealer alteration along with finishing technique.
